

Nucleus Computer Services P/L

Ultimate Wireless

GRAND ULTIMATE WIRELESS is a VGA to TV converter with an integrated 2.4GHz wireless transmitter & separate receiver. Transmit the computer's video and audio to any remote TV. It is ideal for Internet or DVD/VCD movie viewing, presentations, baby/patient monitoring, burglary detection, theft prevention, or home/company monitoring.

System Requirements

- * Desktop or laptop computer with HD15 VGA standard connection.
- * TV or VCR that supports NTSC or PAL video standard with composite video input (required for wireless transmission), (or) S-Video input, (or) RGB video input, (or) SCART input connector.
